Newsletter

1st December 2021

Dear Parents,

The chill of the December air makes our tiny tots bundle up in woollen jackets and sweaters to keep snug and warm. It also brings in a spurt of recharged energy and the children love being outdoors in the warmth of the sun, amidst bright fresh flowers.

Christmas Celebration

The vigour, excitement and energy of the month gone by has left an everlasting impression on the little ones. Children 's Day was celebrated with a plethora of activities. The highlights of the day were a Puppet show and Cartoon Parade. The day ended on a happy note where the children enjoyed the dance show put together specially for them by their teachers. Guru Nanak ji 's birthday was also commemorated with a special activity.

The month brings in gaiety and festivity with eager anticipation of Christmas which harbours the spirit of caring and sharing. Our little hands will be busy making Christmas decorations and knick knacks. Their eagerness to meet Santa Clause and receive a gift from him brings cheer and warmth to our hearts.

The year will be ending on a busy note, each day bringing with it new experiences and pleasures. In anticipation to the New Year the children should start thinking of their new year resolutions and as parents it would be nice if you could steer their young minds towards positive and realistic promises.

Knowyopedia- 'Do it to know it' will be the theme for the special week and the highlight of this month. Each child will be given a chance to share his /her experience with his/her classmates and learning will become fun as they discover the wonders hidden in experiments they perform. Children are always eager to share new findings and thus this will also boost their communication skills. They will be helped by their teachers on this road of discovery.

*May all the sweet magic of Christmas
conspire to gladden your heart and fill
every desire. Merry Christmas!*

**Merry
Christmas**

ACTIVITIES OF THE MONTH (on MS Teams)

9th & 10th DECEMBER 2021 (Thursday & Friday):

KNOWYOPEDIA

Science offers children an understanding of the world around them. When they participate in science activities, it nurtures their curiosity and helps in the cognitive development of the children. It really encourages them to develop their skills and learn from the evidence. In order to give the children the opportunity to learn and grow, **Knowyopedia** – ‘Do it to know it’ will be celebrated on 9th December 2021 & 10th December 2021. It will be a platform for them to develop into aware individuals, who will in the long run make a positive impact on society.

Please Note: The experiment to be performed by the child will be shared personally by the teacher.

24th DECEMBER 2021 (Friday): CHRISTMAS ASSEMBLY

Christmas is celebrated on 25th December every year as it marks the birth anniversary of Lord Jesus Christ. Popular customs include exchanging gifts, decorating Christmas trees, attending mass at the church and sharing meals with family and friends. There’s something special about Christmas and children look forward to this festival the most, eagerly awaiting the gifts they receive from Santa Claus. To make it very exciting and memorable for our little ones, a special assembly will be held followed by an activity (material required will be sent through the weekly list). Fun, frolic and celebrations will be the highlight of the online session on MS Teams along with an interesting activity and maybe - Santa might drop in to meet our little ones... Ho! Ho! Ho!

Important Note:

The P.T.M. will be held on Saturday, 18th December 2021 on MS Teams.
