1st February 2021

Dear parents,

The cold month of January gives way to warmer days in February with a fusion of colours all around as flowers bloom and fresh grass raises its head. The little ones too are blossoming into young, confident achievers with each passing day and seeing them perform with aplomb and without any inhibition fills our heart with pride.

Lohri and Republic Day celebrations were the highlights of last month, arousing the spirit of patriotism and respect for our nation in the little ones. A special online assembly was conducted to celebrate Republic Day, an important day to remember for every Indian, when the constitution of India came into effect.

The tradition of celebrating Lohri as a harvest festival of India was discussed with the help of some pictures. Munching peanuts, rewari and popcorn, while foot tapping numbers were played for the children to dance added a fun element to the celebrations.

The little children always look forward to new experiences and we continue on our journey of exploration and discovery and move ahead towards our goal of motivating and educating the little ones. **‘LEARN ANY THING, ANY WHERE, ANY TIME.’**

‘KNOWYOPEDIA’ being the theme for a special week will be the highlight of this month. The children will be made aware of the lesser known facts about our country – India. Our space programme and important monuments will be part of this learning platform. Learning will become fun as the children discover the wonders hidden in India through some interesting activities. Children are always eager to learn and boost their communication skills through discussions in class, helped by their teachers on this road to discovery.

ACTIVITIES OF THE MONTH (on MS Teams)

11th- 12th February 2021 (Thursday & Friday): **‘KNOWYOPEDIA’**

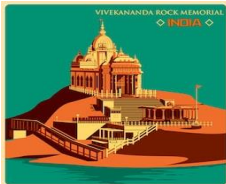

The days will be filled with knowledge, fun and excitement. Children will learn more about their country India - it's space odyssey and few of the important monuments which are located in the metropolitan cities. We aim to educate the little ones about our rich heritage and the progressive steps we are taking towards modernization through various activities. Let us work together to inculcate a deep love for our country and to help our children to be proud Indian citizens.

...a fun place to
play and learn!

KNOWYOPEDIA
