

CYBER MATRIX WEEK

DAY 2- 27th August 2019

Day 2 started with the surfeits of activities based on research work on various types of latest smart gadgets, Computer manners and Parts of computer which gave students learning beyond the books. The activities were based on a topic from their curriculum and was an extension to the concepts they have learned in their classes. All the children participated wholeheartedly in the activities.

On 27th August the students of class I had an activity on *Computer Manners* in the school. The teachers showed and explained the video related to the computer etiquettes on the Smart Board. The children were shown few sets of pictures based on computer manners, they identified the correct manners from them.

Class II: *Let's match it*, activity was conducted for the students to revise all the various parts of a computer taught to them in the class. Worksheet was designed to test the knowledge of the students related to the parts of a computer.

Class III to V had a fun activity on *Revolutionary Devices*, students did the research work on the latest smart gadgets like smart watches, smart bands, echo dot etc. They discussed about their features and uses in the classes as well as wrote their ideas on the A4/A3 size sheets.
