CYBER MATRIX WEEK

DAY 5- 30th August 2019

 In Class I had fun activity in which students formed the computer words by joining the initial letters from the given pictures in worksheet

In Class II, *Glue it up* activity was conducted in which students identified the difference between the Input and Output devices of computer by pasting the pictures of computer devices on the chart provided to them in classes.

In Class III *Creator's Hub* was collage based activity which elevated student's creativity as well knowledge of basics of computer .

In Class IV and V *Talkover session* , a discussion session was conducted in classes where students shared their views and ideas on the following topics like : Safety on Internet,   Uses of internet , Internet boon or bane? , How Social Media is Useful? This activity was organised to enable students become effective communicators as well as confident and involved learners

Day 5 was indeed a pleasure to see the students reach out of the box and present their talents and skills to paint a moment of their own imagination in the canvas of their life
